

MIO-400

CONVENTIONAL INPUT / OUTPUT MODULE

The **MIO-400** module is used to supervision and control of fire protection equipment or fire protection systems and other devices.

It is designed to operate in the detection line of the **ACSP-402** addressable fire alarm control panel.

- 4 inputs:
 - selection of input polarity: NO or NC,
 - programmable input type,
 - detection of short circuit or open circuit.
- 4 relay outputs:
 - programmable output type,
 - capability to control electrical devices powered with 230 VAC,
 - resistive, inductive or capacitive load switching.
- Double-sided short-circuit isolator.
- Power from the detection line.
- LEDs to indicate:
 - input state,
 - output state,
 - faulty input,
 - faulty module.
- Mountable on 35 mm DIN rail.

TECHNICAL DATA

| | |
|-------------------------------------|------------------|
| Operating temperature range | -10°C...+55°C |
| Weight | 225 g |
| Maximum humidity | 93±3% |
| Dimensions | 122 x 93 x 58 mm |
| Current draw when detecting | 600 µA |
| Current draw when emitting an alarm | 750 µA |
| Power supply voltage | 18...26 V DC |
