

BRACKET E-5

BALL-JOINT HOLDER FOR OPAL/AOD-210 OUTDOOR DETECTORS.

BRACKET E-5 is part of the **BRACKET E** ceiling-and-wall mount distance holder.

The element is intended for mounting the **OPAL (GY)**, **OPAL Plus (GY)**, **OPAL Pro (GY)** and **AOD-210 (GY)** detectors.

The holder allows adjustment of the detector tilt angle in two planes: vertically up to 60° and horizontally up to 90°. This helps you find optimal position of the detector in relation to the protected area.

BRACKET E-5 is mounted on the **BRACKET E-1 (GY)** body. The **BRACKET E-2B (GY)** insert and the **BRACKET E-6** tamper sensor are mounted to the holder.
