

OBU-M-LCD

ENCLOSURE

OBU-M-LCD is a surface-mounted metal enclosure, which, given its size and available mountings, is designed for securing a wide range of SATEL made keypads provided with LCD display. This robust enclosure protects the device against mechanical damage. It comes with a keylock to prevent unauthorized access to the keypad, which is a good solution if the keypad is to be installed in public places or wherever additional mechanical protection may be useful. The enclosure doors are provided with a tamper switch.

- robust metal enclosure
- tamper protection
- keylock
- dimensions: 215 x 150 x 45 mm
