

OBU-M-LED-S

ENCLOSURE

OBU-M-LED-S is a surface-mounted metal enclosure, which, given its compact size and available mountings, is designed for securing the smallest keypads in SATEL's range of products. This robust enclosure protects the device against mechanical damage. It comes with a keylock to prevent unauthorized access to the keypad, which is a good solution if the keypad is to be installed outdoors, in public places or wherever additional mechanical protection may be useful. The enclosure doors are provided with a tamper switch.

- robust metal enclosure
- tamper protection
- keylock
- dimensions: 140 x 135 x 40 mm
