

B-4L

GATE MAGNETIC CONTACT (METAL HOUSING)

Magnetic contacts are basic elements of a perimeter protection system. Large **B-4L** tight magnetic contacts in a metal housing are designed for surface mounting. The metal screen protects the wiring against damage, which makes these contacts a perfect solution for locations particularly vulnerable to sabotage attempts or mechanical exposure. These contacts are screwed to a surface and provide an ideal solution for garage gate installation.

- surface mounted (screw mount)
- rugged, metal sealed body
- armored cable

TECHNICAL DATA

Max. switched current	400 μ A
Maximum humidity	93 \pm 3%
Environmental class according to EN50130-5	II
